EXPLORING MONACO'S ARCHITECTURAL HERITAGE

FROM BELLE ÉPOQUE OPULENCE TO MODERN LUXURY

MONACO AND ITS ARCHITECTURAL HERITAGE TELL A CAPTIVATING TALE OF HISTORY AND OPULENCE. AT MONACO PROPERTIES, WE TAKE YOU ON A JOURNEY TO DISCOVER THE EARLY ARCHITECTURE THAT LAID THE FOUNDATION FOR THE PRINCIPALITY'S ENDURING ALLURE.

BELLE ÉPOQUE SPLENDOR: A GLIMPSE INTO THE PAST

Monaco's early architecture, particularly during the Belle Époque era, is a testament to the principality's commitment to elegance and luxury. Strolling through the streets reveals opulent mansions adorned with intricate detailing, evoking the grandeur of a bygone era. These architectural marvels showcase a fusion of neoclassical and ornate styles, embodying the sophistication that has defined Monaco for centuries.

THE PRINCE'S PALACE: A SYMBOL OF SOVEREIGNTY

Perched on the Rock of Monaco, the Prince's Palace stands as an iconic landmark. Its medieval architecture, with fortified walls

and towers, speaks to the principality's rich history. Originally a Genoese fortress, the palace evolved over centuries, blending various architectural influences. Today, it remains both a residence and a symbol of Monaco's enduring sovereignty.

MONTE CARLO CASINO: GRANDEUR IN GAMING

No exploration of Monaco's architecture is complete without a visit to the Monte Carlo Casino. Designed by Charles Garnier, the visionary behind the Paris Opera House, the casino is a masterpiece of Beaux-Arts architecture. Its lavish interiors, adorned with marble, gold, and crystal, exemplify the glamour that has defined Monte Carlo since the late 19th century.

LUXURY RESIDENCES: THE EVOLUTION OF ELEGANCE

Monaco's residential architecture mirrors the evolving tastes of its affluent residents. From Belle Époque villas to modern penthouses, each property tells a unique story. The juxtaposition of classic and contemporary designs reflects Monaco's commitment to preserving its heritage while embracing innovation.

LE ROCHER: OLD-WORLD CHARM

Le Rocher, or the Rock of Monaco, is home to charming narrow streets and historic houses. The tightly packed buildings showcase traditional Mediterranean architecture, with vibrant facades and wrought-iron balconies. It's a neighborhood where the past seamlessly intertwines with the present.

A VISION FOR THE FUTURE: SUSTAINABLE LUXURY

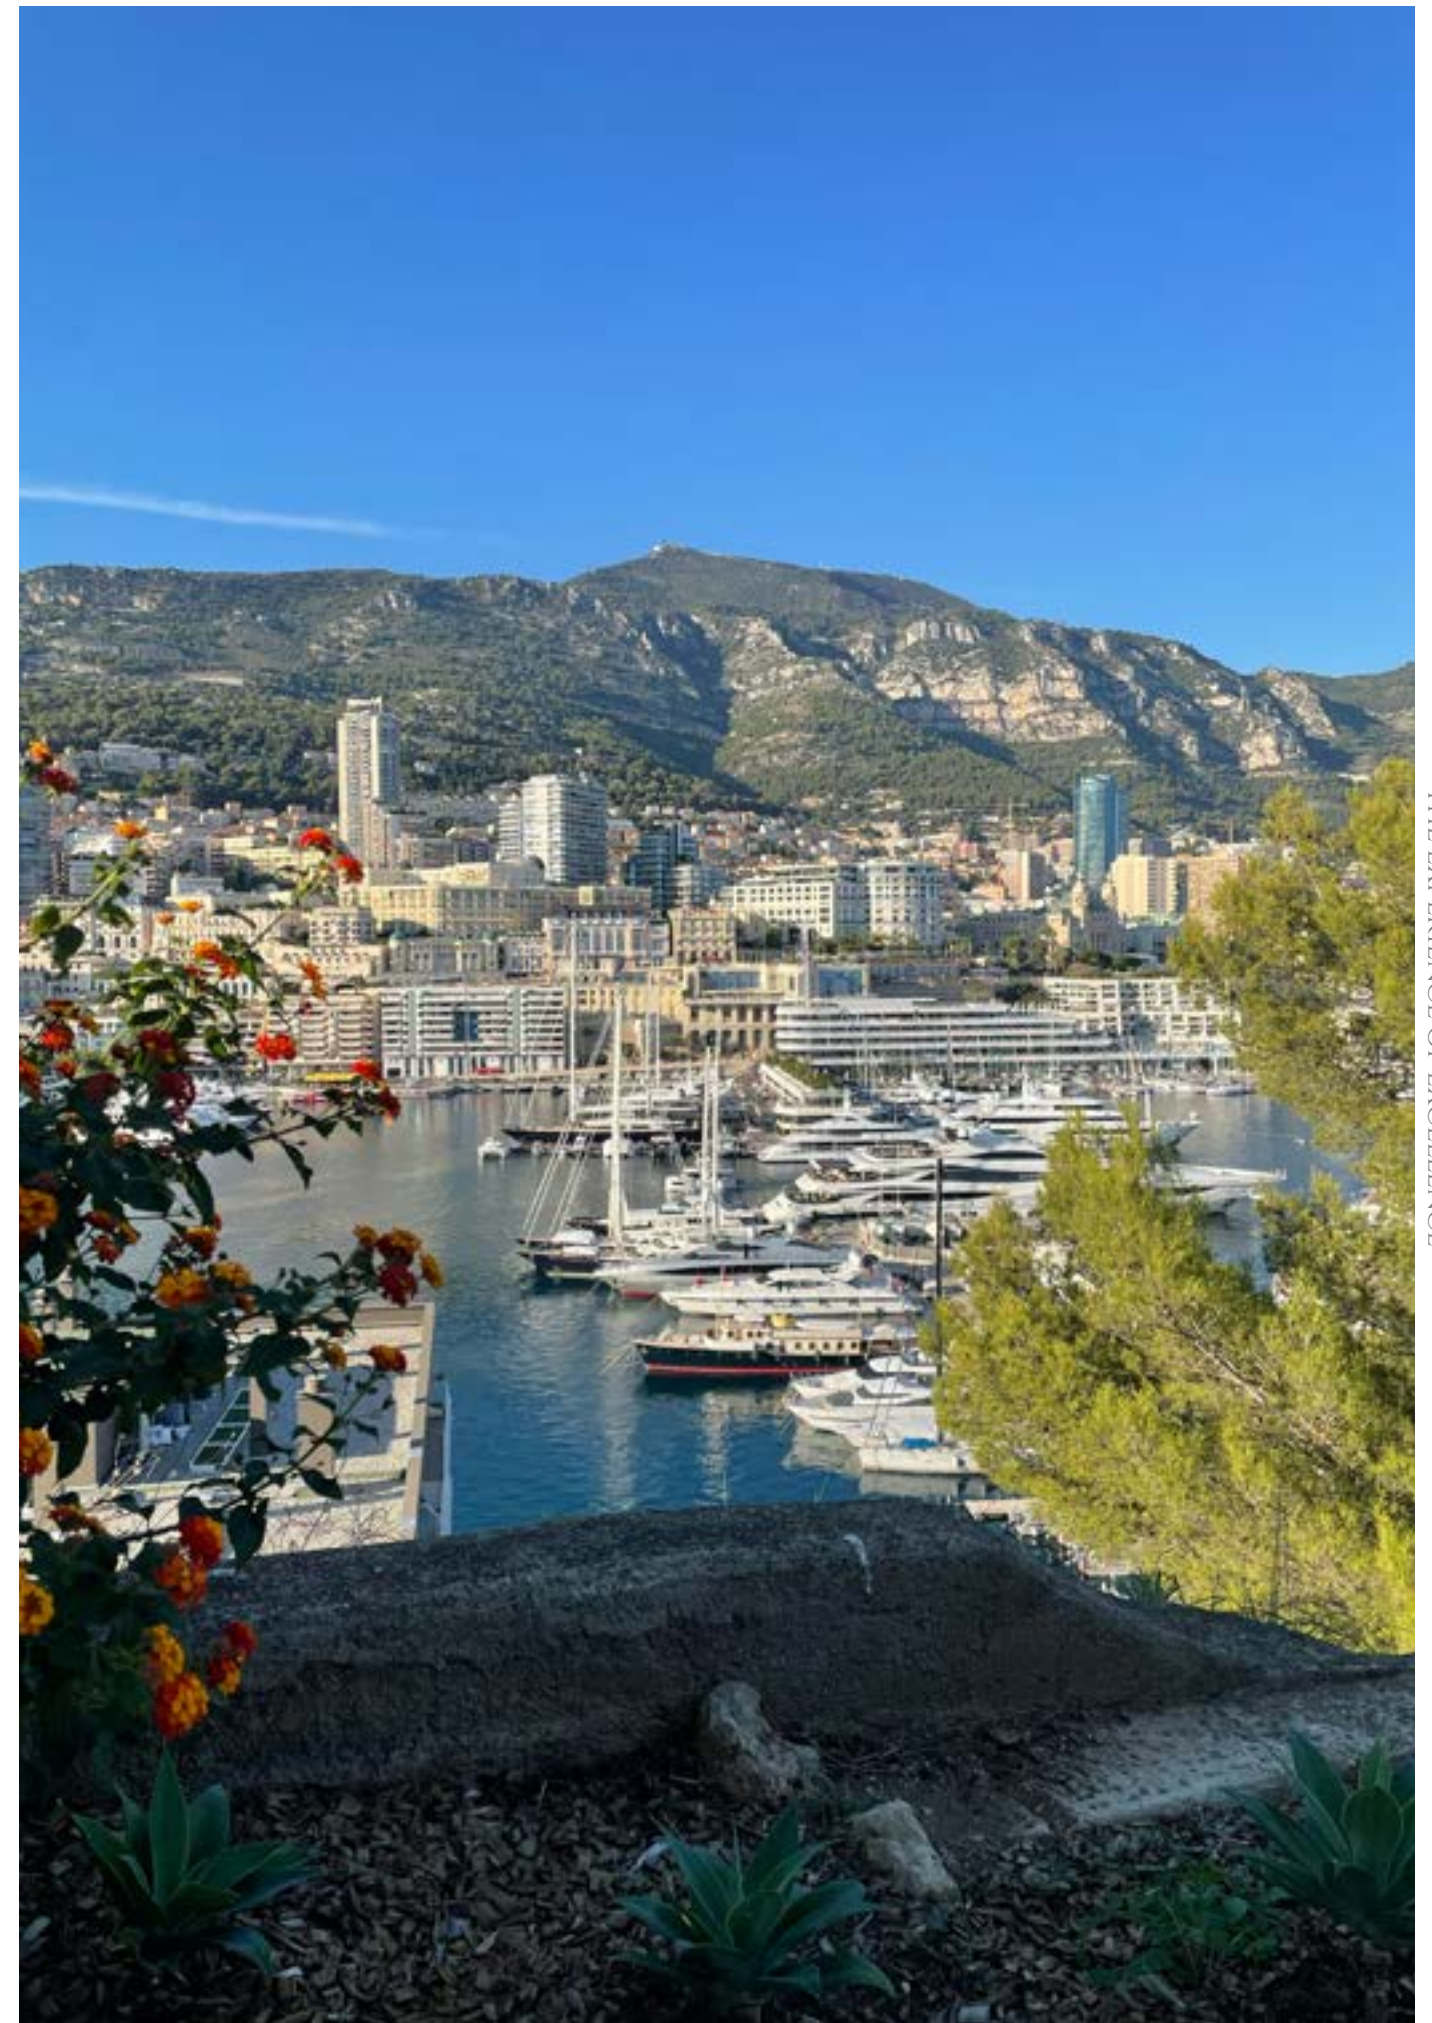

As Monaco embraces the future, sustainable architecture takes center stage. The principality is committed to eco-friendly initiatives, ensuring that modern developments align with environmental responsibility. Green roofs, energy-efficient technologies, and innovative design concepts contribute to a vision of Monaco that is both luxurious and environmentally conscious.

THE EXPERIENCE OF EXCELLENCE

FROM THE FAST LANE TO THE SKIES: AN EXCLUSIVE INTERVIEW WITH A FORMULA 1 LEGEND - THIERRY BOUTSEN

THE GUEST'S JOURNEY FROM A PASSIONATE CHILD FASCINATED BY CARS TO A SUCCESSFUL FORMULA ONE DRIVER WHO LATER TRANSITIONED INTO THE AVIATION INDUSTRY, IS TRULY INSPIRING. HIS TECHNICAL EXPERTISE AND HANDS-ON EXPERIENCE HAVE BEEN PIVOTAL IN BOTH HIS RACING AND AVIATION CAREERS. DESPITE FACING NUMEROUS CHALLENGES, HIS UNWAVERING BELIEF IN HIS ABILITIES AND COMMITMENT TO EXCELLENCE HAVE FUELED HIS SUCCESS. WHETHER ON THE TRACK OR IN THE SKIES, HIS STORY STANDS AS A TESTAMENT TO THE POWER OF PASSION AND PRECISION.

UNIQUE REAL ESTATE

Thank you for joining us today. Let's dive right in. You have always had a remarkable ability to perform well under difficult conditions. Can you tell us more about that?

Sure. I enjoy the challenge of varying conditions on the track. It requires a good eye to see what's happening and adapt quickly. I thrive in these situations because I like the difficulty. Often, even if I don't have the best car, I can make a difference with my driving style and skills.

That's fascinating. Many drivers find specific conditions intimidating, especially when it's slippery. How did you manage to excel in such conditions?

Growing up in Belgium, I had plenty of opportunities to practice in different conditions. It's more challenging to find such conditions in sunny Monaco, for example, so it was an advantage for me. Despite not always having the best car, like when I was with Williams, my skills often allowed me to make a difference.

You started your career very early. Do you remember any moment in particular when you realized this is your dream? What sparked your passion for Formula 1?

It's hard to pinpoint an exact moment, but my mother always said my professional life started when I was three years old. By the time I was seven, I was already saying I wanted to be a Formula 1 driver. I've always been fascinated by cars. Even as a child, at five years old, I could identify cars just by their sound. I was born for this.

That's a remarkable talent. You mentioned you had to be very patient. How did you manage your passion for racing while growing up?

My family wasn't wealthy, so we couldn't afford karting training and races at a very young age. I started racing at 18 while studying mechanical engineering. I joined a racing school, which was affordable, and I won their championship. This win gave me a car for four races, which was the beginning of my career.

During your adolescence, did you consider any other career paths, or was racing your only focus?

Racing was my only focus. I even taught my mother to drive when I was eight since she didn't have a license. I also drove my father's car to the garage when I was 12, but I chose to take it around a block a few kilometers away. My father just laughed when I was escorted home by the police. Even though it was serious, he recognized my passion and talent. My passion for driving was always evident.

That's an interesting story. You chose to study mechanical engineering. Was your interest in the mechanics of cars as strong as your passion for driving?

Absolutely. By 13 or 14, I was preparing motorbike engines for my friends and myself. During my engineering studies, I prepared an engine for racing as a project and used it in my car. With this engine, I won 15 out of 18 races, which was a big success and helped secure sponsorship for my driving.

THE EXPERIENCE OF EXCELLENCE

Your ability to construct and use the engine to win must have been very special. Did you ever doubt your path or face significant challenges that made you question your dream?

I always believed in my goal and never doubted my path. My passion and belief in my abilities were unwavering. It was my reason for life.

Your mental strength seems crucial to your success. You also continued endurance racing with Porsche. Can you tell us about that transition?

Yes, endurance racing with Porsche was a significant part of my career post-Formula 1. I even won the American Championship in 1988. It was a different type of racing, but my experience in Formula 1 helped me adapt and excel.

That's impressive. After retiring from racing, how did you transition into the aviation business?

When I retired, I had no clear plan. However, a friend needed help buying a private jet, and my experience made

me the perfect person to assist. This led to more opportunities, and eventually, I started my own aviation business.

It seems like your hands-on experience with mechanics has been invaluable. How do you ensure the same level of precision and passion in your aviation business?

I approach every project as if it were for myself. Precision and attention to detail are crucial. We've sold over 420 planes in 72 countries, always ensuring the highest standards.

Currently, you have two companies focused on aviation and classic cars. Can you tell us more about these ventures?

My main business is aviation, which has been a passion of mine since I was 21. I also have a business dealing with classic cars, another passion of mine. Both ventures stem from my lifelong interests.

What inspired you to dive into the world of classic automobiles?

After establishing myself in aviation, I wanted to explore other passions. Classic cars have always fascinated me. I saw an opportunity to leverage my experience in a new field, and it was a natural transition given my background in high-precision industries.

Given your success in aviation, what challenges did you face when starting in the classic car business?

The classic car market is unique and has its own set of challenges. Unlike aviation, where the standards are more uniform, classic cars require specialized knowledge and a deep understanding of their history and maintenance. I had to build a new network and adapt to a different kind of customer demand.

You've mentioned the evolution of technology and its impact on various fields, from aviation to automotive design. How do you view the balance between human intuition and computer-driven solutions, especially as technology advances?

The balance between human intuition and computer-driven solutions is crucial. Technology has undoubtedly advanced our capabilities, allowing for precision and efficiency that was once unimaginable. Computers can analyze vast amounts of data and manage complex systems, but they lack the human touch—the ability to respond to unpredictable situations with intuition and creativity. While computers handle many tasks with incredible accuracy, there are nuances and unexpected scenarios where human judgment remains essential. Ideally, a combination of both can yield the best results, integrating the reliability of technology with the adaptability of human insight.

As you continue to grow your business, are there any emerging trends or technologies you are

particularly excited about?

In the world of haute cuisine, few names resonate with the same prestige as Les Ambassadeurs. Once a celebrated gastronomic destination of the 1920s, this legendary venue has been meticulously restored and reimagined under the expert guidance of Michelin-starred chef Christophe Cussac. Nestled within the illustrious Hotel Metropole Monte-Carlo, the revival of Les Ambassadeurs marks a new chapter in Monaco's culinary legacy.

Cussac's culinary philosophy is rooted in simplicity and purity. “Over time,” he reflects, “I have learned to simplify, to go straight to the products, without complicating them. My goal is that when someone tastes my cooking, they immediately understand. And remember it. That's my ideal. Keep it simple, but above all good.”

This ethos is vividly reflected in the new menu at Les Ambassadeurs. Dishes such as freshly marinated sardine with caviar and Menton lemon, and sea bream tartare with caviar cannelloni, showcase his commitment to unadorned excellence. The menu also features highlights like gamberoni

rossi with summer salad and rosemary burrata, lobster lasagne with tarragon and spinach, John Dory with artichoke and coriander broth, and veal chop with porcini mushroom sauce. Desserts are seasonally inspired, including beechwood-smoked chocolate with crunchy gavotte and lemon tartlet with basil sorbet.

Thank you for having me. It's a pleasure to be here.

To start, could you tell us about the background of Galerie Shayesteh and what inspired you to establish this business?
Certainly. Galerie Shayesteh was founded in 2002 with a vision to bring exceptional craftsmanship and unique designs to the world of carpets and rugs. My love for art and fascination with traditional weaving techniques inspired me to create a platform that showcases the beauty and heritage of these handmade pieces.

That's fascinating! It sounds like you have a deep appreciation for artistry. Can you elaborate on the specific specialization and expertise that sets Galerie Shayesteh apart from other carpet businesses?

At Galerie Shayesteh, we pride ourselves on offering a curated collection of carpets and rugs sourced directly from master weavers and artisans worldwide. Our focus is on providing clients with a selection of handcrafted, one-of-a-kind pieces that blend exquisite design, quality materials, and exceptional attention to detail. Your dedication to craftsmanship is truly inspiring. Now, we'd love to hear if there's a particular piece in your collection that holds a special place in your heart. Could you share the story behind it and what makes it so significant to you?

A special piece from my private collection is a rug made in 1971 to celebrate 2,500 years of a Persian

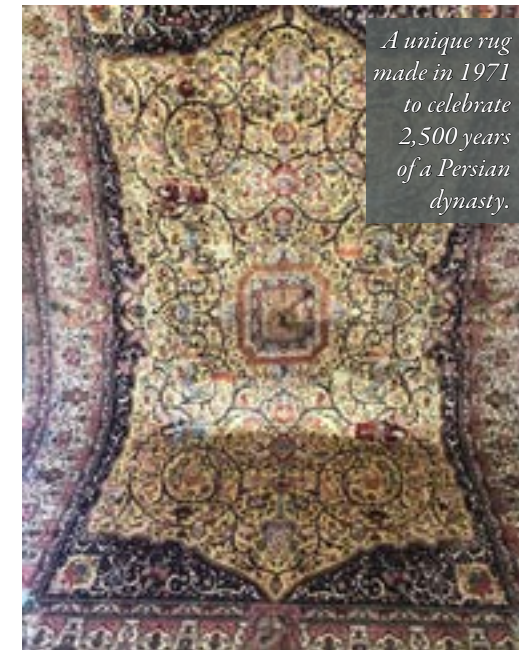

dynasty. This rug, made in Tabriz (Iran), the pieces of which are exceptionally rare, is entirely made of silk. The unusual mix of colors depicts King Koorosh (Cyrus the Great) in the center, surrounded by a horoscope. The border features a famous poem by Hafez. This is a truly unique piece that encapsulates the rich history and artistic craftsmanship of Persian rugs. Measuring 5 meters by 3.5 meters, there are only two originals ever made.

That sounds like an extraordinary piece with deep historical significance. As we near the end of our interview, could you share your vision for the future of Galerie Shayesteh?

Our vision for the future is to continue expanding our presence while maintaining our commitment to uncompromising quality and exceptional customer experiences. We aim to foster greater awareness and appreciation for the artistry and cultural significance of handmade carpets and rugs. MONACO REAL ESTATE MARKET: OVERVIEW AND TRENDS

In 2024, Monaco's real estate market remains resilient despite global economic challenges. Discover the latest trends, including record transaction values and shifting buyer preferences toward luxury properties. Gain insights into the Monte-Carlo and La Rousse districts, and learn about the key players shaping the market.

As we progress in 2024, Monaco's real estate market remains a focal point for investors and luxury property seekers worldwide. Despite ongoing economic challenges, the principality has demonstrated resilience, particularly in its real estate sector. In this article, we'll delve into the latest trends and insights from Monaco's real estate market in 2023, providing you with a comprehensive overview to guide your investment decisions.

PRICES PER SQUARE METER CONTINUE TO CLIMB

In 2023, despite a decrease in the number of sales, Monaco's real estate market saw record-breaking transaction values. The mean price per square meter for resales reached €51,418, marking a modest 1% increase from the previous year and approaching the peak levels seen in 2021. This upward trend was evident across most districts, with five out of seven districts achieving their highest prices to date.

Monaco's property market is characterized by soaring prices and innovative development projects. Over the past decade, the average price per square meter has risen remarkably by 71%, from €37,242 in 2014 to €51,418 in 2023, with some districts, like Larvotto, averaging €65,857. Although there was a modest 1% growth in 2023, most districts saw an increase, surpassing all-time records in five out of seven districts.

MONTE-CARLO AND LA ROUSSE dominated property transactions in 2023, accounting for over 60% of all real estate transactions. La Rousse, with 31.7% of transactions, emerged as the most popular district for property resales since 2019, followed closely by Monte-Carlo at 30.7%.

Despite fewer transactions, Monaco Real Estate Market remains highly sought-after, with agents actively fulfilling client requests in these exclusive districts. Almost every district saw an increase in average price per square meter in 2023. Notably, La Condamine recorded a 19.7% rise to €54,099 per square meter, and Les Moneghetti saw an 18.3% increase to €46,511 compared to the previous year. Reflecting its ultra-exclusivity, Larvotto recorded the highest price per square meter at €65,857, up 5.6% from 2022.

DISTRICT-WISE ANALYSIS

Monte-Carlo and La Rousse continued to dominate the market, accounting for over 60% of resale transactions. These districts are home to some of the most luxurious properties in Monaco, and their popularity remains unchallenged.

La Rousse experienced a 4.2% increase in the number of resales, reclaiming its position as the top district for transactions for the first time since 2019. Meanwhile, Les Moneghetti saw a significant 31.8% decrease, highlighting a shift in buyer interest toward more central and prestigious locations.

TEN-YEAR TRENDS IN NEW PROPERTY PRICES

In the first nine months of 2023, 28 new properties were sold. Although this figure is 68.2% lower than the previous year's record, it remains higher than in 2021. The primary reason for this decline is the lack of flat completions. Two-thirds of the transactions were for off-plan properties, while one-third were for flats completed within the last five years.

Nearly half of all properties sold had four or more bedrooms, including three villas. This category of flats remained stable compared to 2022, while all other categories experienced significant declines.

In 2023, nearly half of the new flats sold had four bedrooms or more. One in two new flats sold for more than €28 million, with an average price of €37.1 million—almost three times the figure for 2022. This sharp rise in both mean and median prices can be attributed to the type of properties sold, with 60.7% of transactions involving flats with three or more bedrooms.

TEN-YEAR CHANGE IN THE NUMBER OF SALES BY FLAT TYPE:

The ten-year trend shows a remarkable increase in both mean and median sale prices. In 2023, the mean price of new flats was €37.1 million, and the median price was €28.5 million. This indicates a strong preference for high-end, spacious properties among buyers.

THE FUTURE OF MONACO'S REAL ESTATE MARKET

Looking ahead, the Monaco real estate market shows no signs of slowing down. The introduction of new ultra-luxury residences and the continued development of eco-district projects will only enhance the principality's appeal. With its unique combination of safety, stability, and luxury, Monaco remains a top destination for those seeking an exclusive and prosperous lifestyle.

CONCLUSION

The 2023 Monaco real estate market has demonstrated resilience and adaptability in the face of global economic challenges. While the number of transactions has decreased, the total transaction

MONACO REAL ESTATE: NAVIGATING THE NEW WAVE OF LUXURY LIVING IN 2024

THE PRINCIPALITY OF MONACO HAS LONG BEEN A FAVORED DESTINATION FOR THE WORLD'S WEALTHIEST, THANKS TO ITS POLITICAL AND ECONOMIC STABILITY, FAVORABLE FISCAL ENVIRONMENT, AND EXCELLENT CLIMATE AND QUALITY OF LIFE.

This long-standing appeal has contributed to a booming residential property market over the past decade and beyond. Since 2010, the total volume of transactions has increased by over 500%, and the number of sales has grown by 130%. For a land-constrained microstate perched on the Côte d'Azur, this is no mean feat and a testament to Monaco's ongoing appeal. It underscores the willingness of prospective residents to pay increasing sums to buy into the Principality's lifestyle. While many markets began to struggle in the second half of 2022, Monaco real estate experienced a strong year. There were 520 transactions across the Principality, which, while lower than the highs seen between 2014 and 2016, was 10% above transaction

volumes seen in the past five years.

A Decade of Growth: The Numbers Tell the Tale

After a record-breaking year for pricing in 2021, when prices surged past the €50,000 per square meter barrier, 2022 saw another record being set. For the first time, total transaction volume reached €3.5 billion for the year, nearly three-quarters of a billion euros higher than the previous record set in 2019. This

FOR THE FIRST TIME, TOTAL TRANSACTION VOLUME CAME TO €3.5 BILLION FOR THE YEAR, NEARLY THREE-QUARTERS OF A BILLION EUROS HIGHER THAN THE PREVIOUS RECORD SET IN 2019.

record transaction volume has largely been driven by the new-build market, which also achieved record-high sales volumes. New build sales crossed the €1

billion threshold for the first time in 2022, precipitated by a large number of properties coming to market—146 in 2022, the third highest number of deliveries ever, behind 1993 and 2015. The 88 new build sales that

Monaco achieved in 2022 were driven both by the high number of flats coming

to market and the ongoing construction projects, which have led to increased off-plan sales, representing nearly a 300% increase over 2021 figures. New builds accounted for a record 34% of total sales in Monaco in 2022, a remarkable figure compared to the average share of 8% since 2006.

Record-Breaking Trends of 2022

The race for space continues in Monaco, both as a result of the pandemic causing a global reassessment of housing needs and because of a change in approach to residence card applications in recent years, meaning greater scrutiny of the size of properties rented or bought by prospective residents. This change has filtered through the market, with many new developments offering larger apartments. As a result, the sales of apartments with three or more bedrooms increased by over €830 million in 2022 compared to the previous year, accounting for over 80% of the new build sales across the Principality. The number of resales in Monaco has returned to pre-pandemic levels. This rebound has largely been driven by the increase in sales of larger apartments, with two-bedroom or larger property sales increasing by 12% from 2021. Two-bedroom properties, in particular, saw the largest increase in sales, with 103 properties transacting, an increase of 18% from the previous year.

The Quest for Space

The volume of resales for the year reached €2.35 billion, with 432 properties changing hands. Two-thirds of these properties were priced below the €5 million mark; however, increasing numbers of sales at the top end of the market are helping to support rising total sales volumes. The number of properties sold with prices above €10 million has increased by over 50% in a year and 300% over the past decade. For decades, the prevailing story of the Monaco property market has been one of chronic

undersupply. For a microstate less than half the size of Central Park in New York City, this is hardly surprising.

Resale Market Resurgence

To meet the consistently high levels of demand, construction projects continue to proceed. There are two large projects in the pipeline: Mareterra and Bay House Monaco, along with other smaller projects such as Le Luciana and the second phase of Villa Portofino. The most ambitious of these developments, Mareterra, will add 110 apartments, ten villas, a new port, and a public park, along with other infrastructure, all built on land reclaimed from the sea. Each of these projects will bring much-needed stock to the Principality but will do little to keep up with the consistently high demand across Monaco. As with the rental sector in other prime residential markets, it is likely that the Monaco rentals market will see another strong year in 2023, driven by increasing numbers of residents flocking to the Principality in search of quality of life, safe havens from global economic turbulence, and the undersupplied sales

“THE TOTAL VOLUME OF REALES FOR THE YEAR TOTALED €2.35 BILLION, WITH 432 PROPERTIES CHANGING HANDS

and resale markets in Monaco. Many new residents will choose to rent before they purchase flats, further supporting rental market performance.

Future Developments: Meeting Demand

As with the rental sector in other prime residential markets, it is likely that the Monaco rentals market will see another strong year in 2023, as a result of increasing numbers of residents flocking to the Principality in search of quality of life, safe havens from global economic turbulence, and the undersupplied sales and resale markets in Monaco. Many new residents will choose to rent before they purchase flats, further supporting rental market performance.

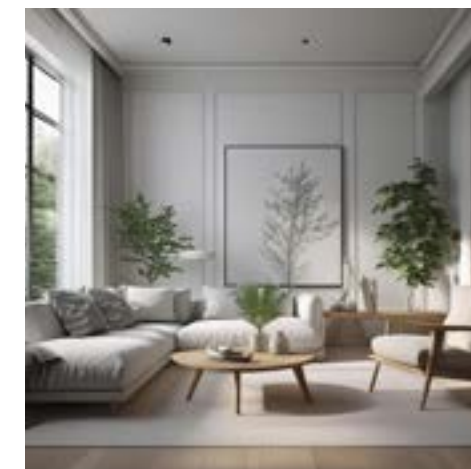

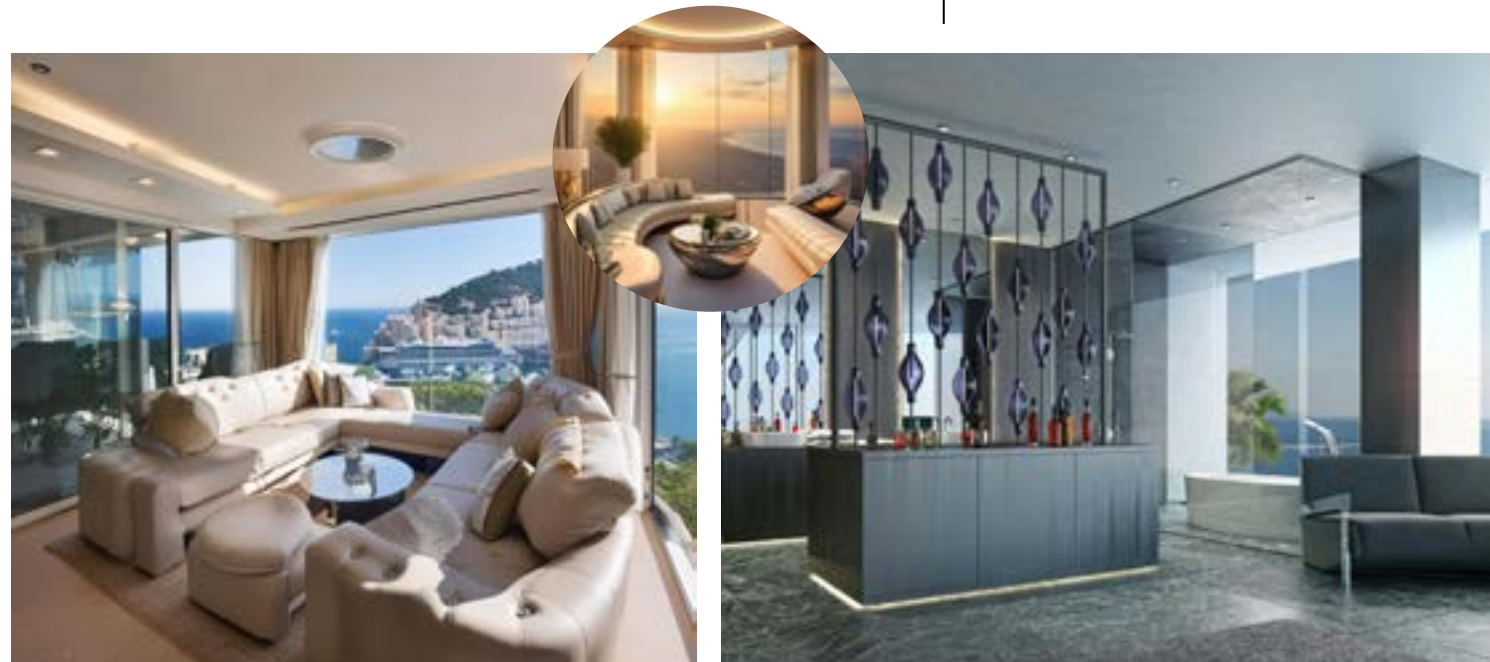

Conclusion: Monaco's Unstoppable Appeal

The 2023 Monaco real estate market has demonstrated resilience and adaptability in the face of global economic challenges. While the number of transactions has decreased, the total transaction value and average property prices have reached new heights. This trend indicates a growing preference for high-end, luxury properties, making Monaco an attractive destination for affluent buyers. Whether you are looking to invest in Monaco's real estate or stay updated on market trends, understanding these dynamics can help you make informed decisions.

UNDERSTANDING SOCIÉTÉ CIVILE IMMOBILIÈRE - *SCI'S IN MONACO*

UNLOCKING THE STRATEGIC ADVANTAGES OF AN SCI IN MONACO

IN THE EVER-EVOLVING WORLD OF REAL ESTATE INVESTMENT, CHOOSING THE RIGHT LEGAL STRUCTURE CAN MAKE ALL THE DIFFERENCE. ONE PARTICULARLY ADVANTAGEOUS OPTION IS THE SOCIÉTÉ CIVILE IMMOBILIÈRE (SCI), ESPECIALLY IN MONACO. THIS SERIES WILL EXPLORE THE COMPLEXITIES OF SCIS, HIGHLIGHTING THEIR BENEFITS, THE PROCESS OF ESTABLISHMENT, AND WHY THEY ARE AN EXCELLENT CHOICE FOR SAVVY INVESTORS.

WHAT IS AN SCI AND WHAT IS IT FOR?

An SCI (Société Civile Immobilière) is a non-commercial legal entity created to own and manage real estate. It allows members—whether family members or a group of individuals—to collectively own and manage properties in varying shares. SCIs are especially beneficial for those looking to manage the gradual transfer of inheritance, offering a structured and efficient way to handle real estate assets.

THE MONEGASQUE SCI ADVANTAGE

In Monaco, an SCI can acquire property both within the Principality and abroad, such as in France. The registration process for a Monegasque SCI is similar to that in France, with the key distinction that the company's registered office must be located in Monaco. A significant advantage of a Monegasque SCI is the confidentiality it offers; information about the company and its owners is not publicly accessible, except under specific conditions, such as official requests from authorities.

Moreover, unlike its French counterpart, a Monegasque SCI can, if authorized by

its statutes, own movable assets, including financial instruments and shares. This flexibility provides substantial benefits for those who wish to collectively manage a portfolio of both financial and real estate assets.

HOW TO ESTABLISH AN SCI IN MONACO

Creating an SCI is relatively straightforward and typically occurs during the property acquisition phase. After signing a preliminary real estate purchase agreement, an accounting firm or notary will handle the SCI's creation. This process involves drafting the company's articles of association, publishing a registration notice, and registering the company with the Chamber of Commerce and the Internal Revenue Service.

HOW DOES AN SCI OPERATE?

An SCI requires at least two members, who may be individuals or legal entities, with no maximum limit on the number of owners and no restrictions on nationality. Even minors can be members since the company is non-commercial. The

company's charter outlines its operations and must include essential details such as the company's name, legal address, purpose, and founder information. The charter also specifies the division of shares and founder contributions, which can be monetary or proprietary, forming the company's social capital. Importantly, the charter can include clauses to streamline management, such as appointing a manager with specific authority and detailing the process for selling shares or transferring them upon a member's death.

TAXATION OF AN SCI

As a "transparent" organization, the SCI itself is not taxed; instead, the founders are individually subject to taxation based on their shares in the company. This transparency allows for straightforward tax management, aligning with the personal tax situations of the members.

TRANSFERRING LEGACIES AND GIFTS THROUGH AN SCI

One of the most notable benefits of an SCI is the simplified process for transferring legacies and gifts. Heirs can be admitted to the company at any time,

A STRATEGIC ADVANTAGE FOR REAL ESTATE INVESTMENT

usually with a minimum number of shares. This flexibility facilitates the management and transfer of ownership, helping to preserve the integrity of the real estate holdings.

FORMALITIES FOR RUNNING AN SCI

Proper management of an SCI requires adherence to certain formalities, such as holding an annual general meeting documented by the manager. Additionally, SCIs must maintain simplified accounting records to ensure transparency and compliance with regulatory requirements. It's also important to note that the list of beneficial owners of the SCI must be declared to Monaco's authorities, and the manager or owner of the SCI is responsible for keeping this information up to date. Any changes within the SCI must be reported to the authorities annually.

UNLOCK THE FULL POTENTIAL OF YOUR REAL ESTATE VENTURES

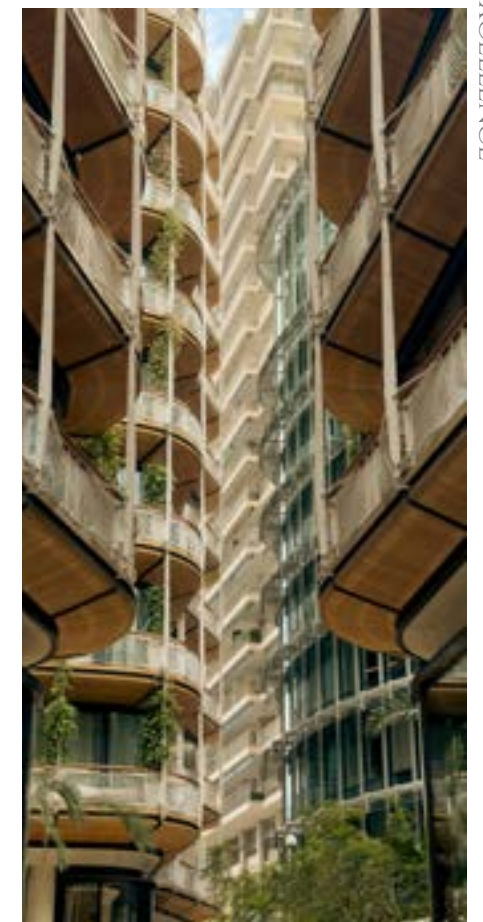

At Monaco Properties, we specialize in helping clients establish SCIs in Monaco, ensuring they maximize the benefits of this powerful legal structure. Contact us today to learn more about how we can assist you in achieving your real estate goals through an SCI.

Artiste DOVA : beyond conventional boundaries

photo: DOVA

As a member of the Monaco National Committee of the International Association of Art affiliated with UNESCO, under the presidency of H.S.H. Prince Albert II, artiste DOVA has created her unique style of metaphysical abstraction. This style transcends the boundaries of reality and transports the viewer to a universe where spirit becomes matter.

A fragile and sensitive woman, armed with her palette knives, she combines the tradition of oil painting with a unique technique, forming complex textures composed of thousands of touches of colors and shades. These range from subtle harmonies to striking contrasts, revealing a rich and expressive emotional palette.

@DOVASVETA

The tunnel of time (Oil on canvas, knife 116x81 cm)

The painting "Tunnel of Time" reflects the author's ideas about the concept of time, the cyclicity of life and death. It illustrates the infinite corridor of time, where every person and every event retain their place and leave their marks as they pass through.

The painting captures the moment of unity between the past, present, and future, where the living and the dead are united and coexist in the same instant within the same space, connected by the threads of time.

The metaphysical abstraction of artist Dova surpasses the confines of reality, and offers viewers an intimate and universal experience.

"Tunnel of time" presentation at the next exhibition "Monaco - Japan" is from 1 to 3 November in the Rainier III Auditorium, Monaco

"Matrix: game of chess" presentation at the next exhibition is from 2 to 22 September in the "Gallery Art in House", Warsaw, Poland

Matrix: game of chess (Oil on canvas, knife 116x90 cm)

The "Matrix: Game of chess" is a reflection of human life in the game both in its form and its essence. The matrix of the game, like the matrix of life, is perfect and unchanging, and although we cannot alter the rules of life or the rules of the game, it is up to us whether our life and our game are brilliant, active, and memorable, or dull, gray, and uninteresting.

But as each of us conducts our own chess game, making moves and shifting pieces on the chessboard of our lives, we are all, in turn, pieces on the chessboard of bigger games.
